

eView

Meeting public disclosure commitments doesn't have to be complicated

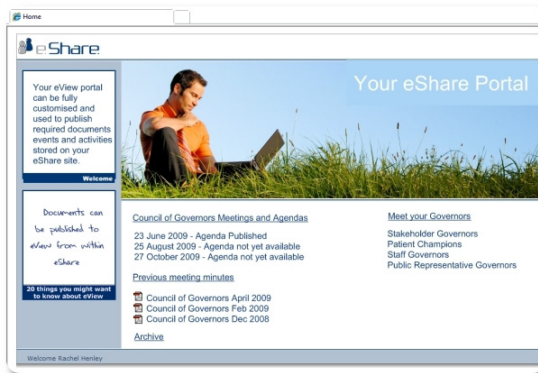

eView has been developed to enable our clients to make selected governance information accessible to scheme members.

Public disclosure websites now as easy as editing a word document

Disclosure to members, or publically, of certain scheme information is necessary, but often viewed as a burden and at risk of being overlooked or inaccurate.

Use 'one-click' publication from your scheme governance system.

Never again rely on manual upload of public disclosure documents which creates duplicated workload and risks incorrect version publication.

"eShare has helped us to improve our standards of governance and allows us to demonstrate that we are adhering to the Codes of Practice with greater transparency."

- Ollie Biobakui, Governance Support Assistant, Royal and SunAlliance

With eView, you are able to take charge of all content of your eView site, editing the text and content of each page, as well as:

- Linking publicly disclosed documents directly to your governance workspace, with any updates replicated on the public access website
- One click publication eliminates duplication of work effort
- Publication is carefully controlled through controlled sign-off
- Version control of public documents is ensured through automatic alerting

How eView benefits you

Greater transparency

Enhanced communications

Easy, cost effective website

Easy access to relevant information

Full content control with no technical expertise

Version history to changes to web pages and documents

Content approval process to changes

A Complete Governance Solution

eView is used with one or more of our other modules to create a complete solution to meet all your governance needs. Available modules include: **eMeetings**, **eContols**, **eKnowledge**, **eDecisions**, **eAppoint**, **Procedure Manager** and **Trustee Training**.
